SUMMARY

I am a third-year Computer Science and Engineering student at Nagaland University with a strong interest in Artificial Intelligence, Machine Learning, Cybersecurity, and Full Stack Development. I have experience working on practical projects using Python and web technologies, including machine learning-based applications and secure web systems. I am passionate about building real-world solutions, continuously learning new technologies, and applying my problem-solving skills to develop intelligent and scalable software systems.

EDUCATION

Nagaland University

2023 – Expected 2027

B.Tech - Computer Science and Engineering

CGPA: 8.40

Kohima, Nagaland

B.S Inter College

March 2023

Higher Secondary Examination (Class XII) - BSEB - 71.2%

Karua, Samastipur, Bihar

Campus Public School

March 2021

Secondary Examination (Class X) - CBSE - 65.2%

D.r R.P.C.A.U, Pusa, Samastipur, Bihar

PROJECTS

Face Recognition Attendance System — Python, OpenCV, Machine Learning

Developed an AI-based system that detects and recognizes faces to automatically record attendance. Implemented facial recognition using Python and OpenCV with machine learning techniques in Google Colab.

Student Performance Prediction System — Python, Pandas, Scikit-learn

Built a machine learning model to predict student academic performance based on historical academic data. Performed data preprocessing, model training, and evaluation using Python libraries.

Fake News Detection System — Python, Machine Learning

Developed a machine learning model that classifies news articles as real or fake using text analysis techniques. Applied feature extraction and classification algorithms to improve prediction accuracy.

Full Stack User Authentication System — HTML, CSS, JavaScript, PHP, MySQL

Developed a secure web application that allows users to register and login with authentication. Implemented backend database integration and session management using PHP and MySQL.

TECHNICAL SKILLS

- **Programming Languages:** HTML, CSS, JavaScript, PHP, Python, C, C++
- **Databases:** MySQL, SQL
- **Cybersecurity Tools:** Kali Linux, Kioptrix, VirtualBox
- **Concepts:** Vulnerability Analysis, Penetration Testing Fundamentals
- **Tools:** GitHub, Google Colab, VS Code

CERTIFICATIONS

- The fundamentals And Applications of Machine Learning on Multiscale Data
- Cyber Security Essentials Skills Under Future Skills PRIME Project - NIELIT Kohima
- 8 week online training on Machine Learning wih AI
- Web Development Fundamentals - IBM

WORKSHOP AND TRAINING

- Cybersecurity Bootcamp – NIELIT Kohima (2025)
- Web Development Workshop – Nagaland University (2025)

EXTRACURRICULAR

- Participated in coding and debugging competitions.
- Active member of technical activities in college.
